Chapter 1

Namespace Index

1.1 Packages

Here are the packages with brief descriptions (if available):

BasicTracker	The main namespace for Basic Tracker. All code should be in this namespace	7
------------------------------	--	-------------------

Chapter 2

Class Index

2.1 Class List

Here are the classes, structs, unions and interfaces with brief descriptions:

BasicTracker.AudioSubsystem	9
BasicTracker.Channel	10
BasicTracker.ConsoleX	
Gui handling code and rudimentary API	11
BasicTracker.effectParameter	17
BasicTracker.G	
Global constants	19
BasicTracker.MainWindow	23
BasicTracker.Note	25
BasicTracker.Pattern	28
BasicTracker.Program	
Main program class	29
BasicTracker.Song	31
BasicTracker.volumeParameter	35

Chapter 3

File Index

3.1 File List

Here is a list of all files with brief descriptions:

C:/Users/moliv/OneDrive/source/repos/BasicTracker/BasicTracker/ AudioSubsystem.cs	37
C:/Users/moliv/OneDrive/source/repos/BasicTracker/BasicTracker/ Class1.cs	37
C:/Users/moliv/OneDrive/source/repos/BasicTracker/BasicTracker/ Program.cs	38
C:/Users/moliv/OneDrive/source/repos/BasicTracker/BasicTracker/obj/Debug/ TemporaryGeneratedFile_036C0B5B-1481-4323-8D 38	
C:/Users/moliv/OneDrive/source/repos/BasicTracker/BasicTracker/obj/Debug/ TemporaryGeneratedFile_5937a670-0e60-4077-87 38	
C:/Users/moliv/OneDrive/source/repos/BasicTracker/BasicTracker/obj/Debug/ TemporaryGeneratedFile_E7A71F73-0F8D-4B9B-B 38	
C:/Users/moliv/OneDrive/source/repos/BasicTracker/BasicTracker/Properties/ AssemblyInfo.cs	38

Chapter 4

Namespace Documentation

4.1 BasicTracker Namespace Reference

The main namespace for Basic Tracker. All code should be in this namespace.

Classes

- class [AudioSubsystem](#)
- class [Channel](#)
- class [Consolex](#)

Gui handling code and rudimentary API.

- struct [effectParameter](#)
- class [G](#)

Global constants.

- class [MainWindow](#)
- class [Note](#)
- class [Pattern](#)
- class [Program](#)

Main program class.

- class [Song](#)
- struct [volumeParameter](#)

4.1.1 Detailed Description

The main namespace for Basic Tracker. All code should be in this namespace.

Chapter 5

Class Documentation

5.1 BasicTracker.AudioSubsystem Class Reference

Collaboration diagram for BasicTracker.AudioSubsystem:

Public Member Functions

- [AudioSubsystem](#) ()

Static Package Functions

- static void [Tick](#) ()

5.1.1 Constructor & Destructor Documentation

5.1.1.1 AudioSubsystem()

```
BasicTracker.AudioSubsystem.AudioSubsystem ( )
```

5.1.2 Member Function Documentation

5.1.2.1 Tick()

```
static void BasicTracker.AudioSubsystem.Tick ( ) [static], [package]
```

Here is the caller graph for this function:

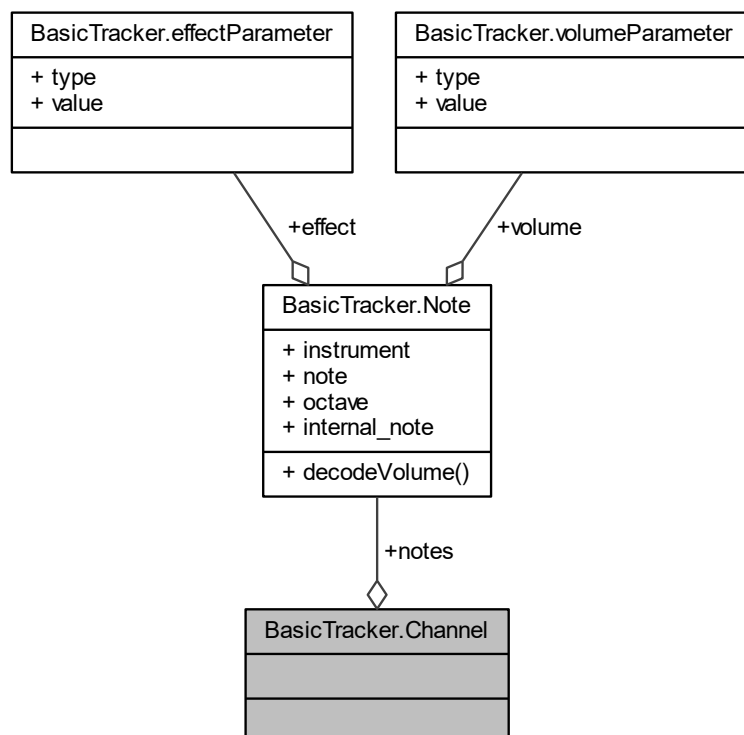

The documentation for this class was generated from the following file:

- <C:/Users/moliv/OneDrive/source/repos/BasicTracker/BasicTracker/AudioSubsystem.cs>

5.2 BasicTracker.Channel Class Reference

Collaboration diagram for `BasicTracker.Channel`:

Public Attributes

- `Note[] notes = new Note[G.depth]`

5.2.1 Member Data Documentation

5.2.1.1 notes

`Note [] BasicTracker.Channel.notes = new Note[G.depth]`

The documentation for this class was generated from the following file:

- `C:/Users/moliv/OneDrive/source/repos/BasicTracker/BasicTracker/Program.cs`

5.3 BasicTracker.Consoleex Class Reference

Gui handling code and rudimentary API.

Collaboration diagram for BasicTracker.Consoleex:

BasicTracker.Consoleex
+ control + shift + alt - lastkey
+ DeleteMenu() + handleMovement() + GetKey() ~ RefreshKeys() - GetSystemMenu() - GetConsoleWindow() - Consoleex()

Public Member Functions

- static int `DeleteMenu` (IntPtr hMenu, int nPosition, int wFlags)
For removing abilities.

Static Public Member Functions

- static void [handleMovement](#) ()
Handles the cursor movement.
- static ? ConsoleKey [GetKey](#) ()
returns the last key from the user

Static Package Functions

- static void [RefreshKeys](#) ()
Gets a key from the user and set lastkey to it.

Properties

- static bool [control](#) [get, private set]
Cached bool for if the Control key is pressed. The setter is private.
- static bool [shift](#) [get, private set]
Cached bool for if the Shift key is pressed. The setter is private.
- static bool [alt](#) [get, private set]
Cached bool for if the Alt key is pressed. The setter is private.

Private Member Functions

- static IntPtr [GetSystemMenu](#) (IntPtr hWnd, bool bRevert)
For getting handles.
- static IntPtr [GetConsoleWindow](#) ()
For getting handles.

Static Private Member Functions

- static [Consolex](#) ()
Empty static console constructor.

Static Private Attributes

- static ? ConsoleKey [lastkey](#)
Cached value for last key pressed. It's private, but there's a public GetKey that returns it.

5.3.1 Detailed Description

Gui handling code and rudimentary API.

It helps the [MainWindow](#) create the GUI for the program. It might not be totally needed but it helps organise the code. I think. It was originally meant to handle a lot of the GUI code for multiple windows, like clipping and spawning and such. As there is only one window this is redundant to an extent.

5.3.2 Constructor & Destructor Documentation

5.3.2.1 Consoleex()

```
static BasicTracker.Consoleex.Consoleex ( ) [static], [private]
```

Empty static console constructor.

init run automatically before anything else. Contains code to set up the screen for the first time, such as resising and removing the ability to maximise. It also writes out the default starting screen. Here is the call graph for this function:

5.3.3 Member Function Documentation

5.3.3.1 DeleteMenu()

```
static int BasicTracker.Consoleex.DeleteMenu (
    IntPtr hMenu,
    int nPosition,
    int wFlags )
```

For removing abilities.

Here is the caller graph for this function:

5.3.3.2 GetConsoleWindow()

```
static IntPtr BasicTracker.Consoleex.GetConsoleWindow ( ) [private]
```

For getting handles.

Here is the caller graph for this function:

5.3.3.3 GetKey()

```
static ? ConsoleKey BasicTracker.Consoleex.GetKey ( ) [static]
```

returns the last key from the user

It's written this way so that for each loop of the mainloop the same key is given to everything. Otherwise some keys are missed or are read by the wrong function.

Returns

Either the `ConsoleKey` of the latest key pressed, or null from lastkey.

Here is the caller graph for this function:

5.3.3.4 GetSystemMenu()

```
static IntPtr BasicTracker.Console.GetSystemMenu (
    IntPtr hWnd,
    bool bRevert ) [private]
```

For getting handles.

Here is the caller graph for this function:

5.3.3.5 handleMovement()

```
static void BasicTracker.Console.handleMovement ( ) [static]
```

Handles the cursor movement.

It calls the handle movement code on the frontmost window - but there's only one window after the hybrid restructure. It's now redundant in this case. Here is the call graph for this function:

Here is the caller graph for this function:

5.3.3.6 RefreshKeys()

```
static void BasicTracker.Console.RefreshKeys ( ) [static], [package]
```

Gets a key from the user and set lastkey to it.

Here is the caller graph for this function:

5.3.4 Member Data Documentation

5.3.4.1 lastkey

```
? ConsoleKey BasicTracker.Console.lastkey [static], [private]
```

Cached value for last key pressed. It's private, but there's a public GetKey that returns it.

5.3.5 Property Documentation

5.3.5.1 alt

```
bool BasicTracker.Console.alt [static], [get], [private set]
```

Cached bool for if the Alt key is pressed. The setter is private.

5.3.5.2 control

```
bool BasicTracker.Console.control [static], [get], [private set]
```

Cached bool for if the Control key is pressed. The setter is private.

5.3.5.3 shift

```
bool BasicTracker.ConsoleEx.shift [static], [get], [private set]
```

Cached bool for if the Shift key is pressed. The setter is private.

The documentation for this class was generated from the following file:

- C:/Users/moliv/OneDrive/source/repos/BasicTracker/BasicTracker/[Program.cs](#)

5.4 BasicTracker.effectParameter Struct Reference

Collaboration diagram for BasicTracker.effectParameter:

Public Types

- enum [Type](#) {
 [Type.A](#), [Type.B](#), [Type.C](#), [Type.D](#),
 [Type.E](#), [Type.F](#), [Type.G](#), [Type.H](#),
 [Type.I](#), [Type.J](#), [Type.K](#), [Type.L](#),
 [Type.M](#), [Type.N](#), [Type.O](#), [Type.P](#),
 [Type.Q](#), [Type.R](#), [Type.S](#), [Type.T](#),
 [Type.U](#), [Type.V](#), [Type.W](#), [Type.X](#),
 [Type.Y](#), [Type.Z](#), [Type._0](#) }

Public Attributes

- [Type](#) type
- byte [value](#)

5.4.1 Member Enumeration Documentation

5.4.1.1 Type

```
enum BasicTracker.effectParameter.Type [strong]
```

Enumerator

A	Set Speed.
B	Position Jump.
C	Pattern Break.
D	Volume Slide.
E	Portamento Down.
F	Portamento Up.
G	Tone Portamento.
H	Vibrato.
I	Tremor.
J	Arpeggio.
K	Volume Slide + Vibrato.
L	Volume Slide + Tone Portamento.
M	Set Channel Volume.
N	Channel Volume Slide.
O	
P	Panning Slide.
Q	Retrigger.
R	Tremolo.
S	Special.
T	Tempo.
U	Fine Vibrato.
V	Set Global Volume.
W	Global Volume Slide.
X	Set Panning.
Y	Panbrello.
Z	Filter coefficients.
↵	Parameter Extension.
↵	
0	

5.4.2 Member Data Documentation

5.4.2.1 type

[Type](#) `BasicTracker.effectParameter.type`

5.4.2.2 value

`byte BasicTracker.effectParameter.value`

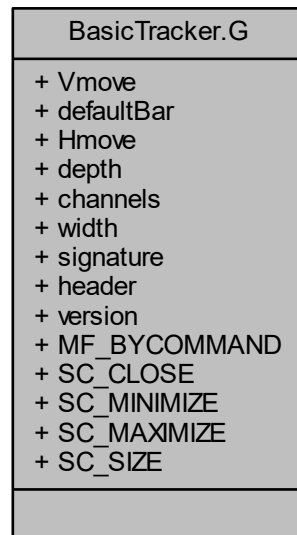

The documentation for this struct was generated from the following file:

- `C:/Users/moliv/OneDrive/source/repos/BasicTracker/BasicTracker/Program.cs`

5.5 BasicTracker.G Class Reference

Global constants.

Collaboration diagram for BasicTracker.G:

Static Public Attributes

- const int **Vmove** = 1
Lines that are moved when the up or down arrows are pressed whilst holding CTRL.
- const string **defaultBar** = "|_ _ - - - - -"
The starting value for each note.
- const int **Hmove** = 15
Lines that are moved when the left or right arrows are pressed whilst holding CTRL. Is defaultBar.Length.
- const int **depth** = 32
How many rows are in a pattern.
- const int **channels** = 8
How many channels there are, duh.
- const int **width** = 15 * 8
*defaultBar.Length * channels, the columns needed for the screen*
- static readonly char[] **signature** = { 'B', 'S', 'C', 'M' }
- const string **header**
A ridiculous string which contains the starting state of the header for the GUI. It's really long because if it reaches the end of a line it automatically goes to the next line and so I can't put a new line there. So it's just a really long line. It's a mess really, don't look at it.
- static readonly Version **version** = typeof(Program).Assembly.GetName().Version
Gets the autoincrementing version of the app. Used in checking the file formats.
- const int **MF_BYCOMMAND** = 0x00000000

Command for something, can't remember.

- `const int SC_CLOSE = 0xF060`

Code to remove the ability to close the app >:)

- `const int SC_MINIMIZE = 0xF020`

Code to remove the ability to minimize the app. Unused.

- `const int SC_MAXIMIZE = 0xF030`

Code to remove the ability to maximise the app.

- `const int SC_SIZE = 0xF000`

Code to remove the ability to resize the app.

5.5.1 Detailed Description

Global constants.

The `G` class includes a pile of constants and readonly values which can be accessed from anywhere in the document. It allows for easy editing of constants for the entire document.

5.5.2 Member Data Documentation

5.5.2.1 channels

```
const int BasicTracker.G.channels = 8 [static]
```

How many channels there are, duh.

5.5.2.2 defaultBar

```
const string BasicTracker.G.defaultBar = "|_ _ -- --- ---" [static]
```

The starting value for each note.

5.5.2.3 depth

```
const int BasicTracker.G.depth = 32 [static]
```

How many rows are in a pattern.

5.5.2.4 header

```
const string BasicTracker.G.header [static]
```

Initial value:

```
=
@" +-----+-----+-----+-----+
| BASIC TRACKER | Version: 0.01 | Made by John "Molive" Hunter | | EDITING PATTERN | 00001 / 00002 |
| PRESS F1 FOR HELP
+-----+-----+-----+-----+
Song: _____ Author: _____ Octave: 4 Tempo: 00 Speed: 00
Length: 00m 00s
+-----+-----+-----+-----+
ORDERING (scroll at 00000) | 2 | 1 | 2 | 1 | 2 | 1 | 2 | 1 | 2 | 1 | 2 | 1 | 2 | 1 | 2 | 1 | 2 | 1 |
2 | 1 | 2 | 1 | 2
|...|+-----+-----+-----+-----+
All Right!
|"
```

A ridiculous string which contains the starting state of the header for the GUI. It's really long because if it reaches the end of a line it automatically goes to the next line and so I can't put a new line there. So it's just a really long line. It's a mess really, don't look at it.

5.5.2.5 Hmove

```
const int BasicTracker.G.Hmove = 15 [static]
```

Lines that are moved when the left or right arrows are pressed whilst holding CTRL. Is defaultBar.Length.

5.5.2.6 MF_BYCOMMAND

```
const int BasicTracker.G.MF_BYCOMMAND = 0x00000000 [static]
```

Command for something, can't remember.

5.5.2.7 SC_CLOSE

```
const int BasicTracker.G.SC_CLOSE = 0xF060 [static]
```

Code to remove the ability to close the app >:)

5.5.2.8 SC_MAXIMIZE

```
const int BasicTracker.G.SC_MAXIMIZE = 0xF030 [static]
```

Code to remove the ability to maximise the app.

5.5.2.9 SC_MINIMIZE

```
const int BasicTracker.G.SC_MINIMIZE = 0xF020 [static]
```

Code to remove the ability to minimize the app. Unused.

5.5.2.10 SC_SIZE

```
const int BasicTracker.G.SC_SIZE = 0xF000 [static]
```

Code to remove the ability to resize the app.

5.5.2.11 signature

```
readonly char [] BasicTracker.G.signature = { 'B', 'S', 'C', 'M' } [static]
```

The four characters at the very start of the file format. Used for file recognition, so that you can quickly see if a file is a Basic Tracker file.

5.5.2.12 version

```
readonly Version BasicTracker.G.version = typeof(Program).Assembly.GetName().Version [static]
```

Gets the autoincrementing version of the app. Used in checking the file formats.

5.5.2.13 Vmove

```
const int BasicTracker.G.Vmove = 1 [static]
```

Lines that are moved when the up or down arrows are pressed whilst holding CTRL.

5.5.2.14 width

```
const int BasicTracker.G.width = 15 * 8 [static]
```

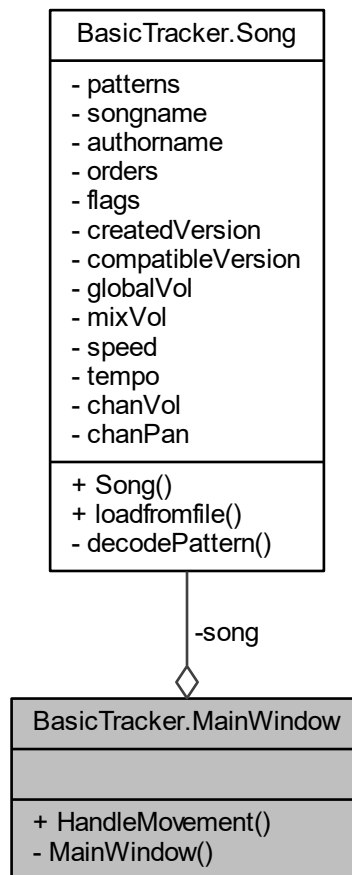

defaultBar.Length * channels, the columns needed for the screen

The documentation for this class was generated from the following file:

- C:/Users/moliv/OneDrive/source/repos/BasicTracker/BasicTracker/[Program.cs](#)

5.6 BasicTracker.MainWindow Class Reference

Collaboration diagram for BasicTracker.MainWindow:

Static Public Member Functions

5.7.2 Member Function Documentation

5.7.2.1 decodeVolume()

```
volumeParameter BasicTracker.Note.decodeVolume (
    byte vol )
```

Here is the caller graph for this function:

5.7.3 Member Data Documentation

5.7.3.1 effect

`effectParameter` BasicTracker.Note.effect

5.7.3.2 instrument

`byte` BasicTracker.Note.instrument

5.7.3.3 volume

`volumeParameter` BasicTracker.Note.volume

5.7.4 Property Documentation

5.7.4.1 internal_note

`byte` BasicTracker.Note.internal_note [set], [private get]

5.7.4.2 note

`N` BasicTracker.Note.note [get], [private set]

5.7.4.3 octave

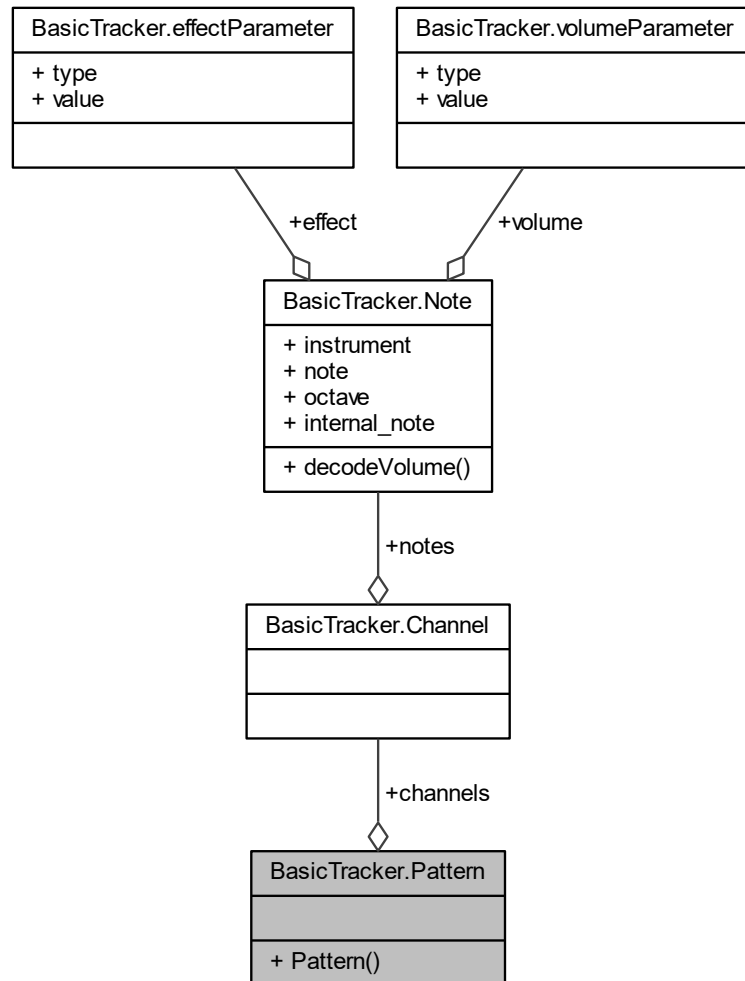

`int` BasicTracker.Note.octave [get], [private set]

The documentation for this class was generated from the following file:

- C:/Users/moliv/OneDrive/source/repos/BasicTracker/BasicTracker/[Program.cs](#)

5.8 BasicTracker.Pattern Class Reference

Collaboration diagram for BasicTracker.Pattern:

Public Member Functions

- [Pattern](#) ()

Public Attributes

- `Channel[] channels = new Channel[G.channels]`

5.8.1 Constructor & Destructor Documentation

5.8.1.1 Pattern()

```
BasicTracker.Pattern.Pattern ( )
```

5.8.2 Member Data Documentation

5.8.2.1 channels

```
Channel [ ] BasicTracker.Pattern.channels = new Channel[G.channels]
```

The documentation for this class was generated from the following file:

- C:/Users/moliv/OneDrive/source/repos/BasicTracker/BasicTracker/[Program.cs](#)

5.9 BasicTracker.Program Class Reference

Main program class.

Collaboration diagram for BasicTracker.Program:

Static Private Member Functions

- static void [Main](#) (string[] args)

The main function.

5.9.1 Detailed Description

Main program class.

It doesn't do much.

5.9.2 Member Function Documentation

5.9.2.1 Main()

```
static void BasicTracker.Program.Main (
    string[] args ) [static], [private]
```

The main function.

Contains the main loop for the program. It's inside a "while not escape" so if you press escape the program should just exit

Parameters

<i>args</i>	Command line arguments
-------------	------------------------

Here is the call graph for this function:

The documentation for this class was generated from the following file:

- byte[] [chanVol](#)
- byte[] [chanPan](#)

5.10.1 Constructor & Destructor Documentation

5.10.1.1 Song()

```
BasicTracker.Song.Song ( )
```

5.10.2 Member Function Documentation

5.10.2.1 decodePattern()

```
Pattern BasicTracker.Song.decodePattern (
    ushort patlen,
    ushort rowlen,
    byte[] data ) [private]
```

Here is the call graph for this function:

Here is the caller graph for this function:

5.10.2.2 loadfromfile()

```
void BasicTracker.Song.loadfromfile (  
    BinaryReader br )
```

Here is the call graph for this function:

5.10.3 Member Data Documentation

5.10.3.1 authorname

```
string BasicTracker.Song.authorname [private]
```

5.10.3.2 chanPan

```
byte [ ] BasicTracker.Song.chanPan [private]
```

5.10.3.3 chanVol

```
byte [ ] BasicTracker.Song.chanVol [private]
```

5.10.3.4 compatibleVersion

```
Version BasicTracker.Song.compatibleVersion [private]
```

5.10.3.5 createdVersion

```
Version BasicTracker.Song.createdVersion [private]
```

5.10.3.6 flags

```
ushort BasicTracker.Song.flags [private]
```

5.10.3.7 globalVol

```
byte BasicTracker.Song.globalVol [private]
```

5.10.3.8 mixVol

```
byte BasicTracker.Song.mixVol [private]
```

5.10.3.9 orders

```
List<ushort> BasicTracker.Song.orders [private]
```

5.10.3.10 patterns

```
List<Pattern> BasicTracker.Song.patterns [private]
```

5.10.3.11 songname

```
string BasicTracker.Song.songname [private]
```

5.10.3.12 speed

```
byte BasicTracker.Song.speed [private]
```

5.10.3.13 tempo

```
byte BasicTracker.Song.tempo [private]
```

The documentation for this class was generated from the following file:

5.11 BasicTracker.volumeParameter Struct Reference

Collaboration diagram for BasicTracker.volumeParameter:

Public Types

- enum [Type](#) {
 [Type.A](#), [Type.B](#), [Type.C](#), [Type.D](#),
 [Type.E](#), [Type.F](#), [Type.G](#), [Type.H](#),
 [Type.P](#), [Type.V](#) }

Public Attributes

- [Type](#) `type`
- byte [value](#)

5.11.1 Member Enumeration Documentation

5.11.1.1 Type

```
enum BasicTracker.volumeParameter.Type [strong]
```

Enumerator

A	Fine Volume Slide Up.
B	Fine Volume Slide Down.
C	Volume Slide Up.
D	Volume Slide Down.
E	Portamento Down.
F	Portamento Up.
G	Tone Portamento.
H	Vibrato Depth.
P	Set Panning.
V	Set Volume.

5.11.2 Member Data Documentation**5.11.2.1 type**

`Type` `BasicTracker.volumeParameter.type`

5.11.2.2 value

`byte` `BasicTracker.volumeParameter.value`

The documentation for this struct was generated from the following file:

- `C:/Users/moliv/OneDrive/source/repos/BasicTracker/BasicTracker/Program.cs`
